13. (CURRENTLY AMENDED) A computer-readable recording medium having a program recorded thereon for causing a computer to manage product information, by:  
sending at least a purchased product information and a purchase number to a customer-terminal;  
receiving a repair request form including the purchase number from the customer-terminal;  
retrieving warranty information corresponding to the ~~purchased product~~  
~~identification~~purchase number received from ~~at the~~ customer-terminal used by ~~a the~~ customer, from a sales information management database managing the ~~purchased product~~

~~identification~~purchase number identifying a product that the customer purchased and the warranty information showing a warranty of the product;

informing selectable request items with the retrieved warranty information ~~retrieved by said code (a)~~ to the customer-terminal; and

conducting a request process corresponding to one of the selectable request items, which is indicated from the customer-terminal.

14. (PREVIOUSLY PRESENTED) The computer-readable recording medium as claimed in claim 13, wherein:

said sales information management database manages the customer information concerning the customer by corresponding the customer to the purchased product identification of the product that the customer purchased ; and

said conducting a request process comprises the codes of:

distributing a repair request sheet including repair information for a repair person who is selected by searching from the sales information management database based on the customer information corresponding to the purchased product identification received from the customer-terminal when one of the selectable request items, which is indicated from the customer-terminal, shows a request to repair the product that the customer purchased , and

maintaining repair contents conducted by the repair person and the purchased product identification of a repaired product as repair history information to a repair history database.

15. (CURRENTLY AMENDED) An apparatus for managing product information, comprising:

an output part sending at least a purchased product information and a purchase number to a customer-terminal;

an input part receiving a repair request form including the purchase number from the customer-terminal;

a sales information management database managing the ~~purchased product identification~~purchase number identifying a product that the customer purchased and warranty information showing a warranty of the product;

a warranty information retrieving part retrieving warranty information corresponding to the ~~purchased product identification~~purchase number received from ~~a~~the customer-terminal used by ~~a~~the customer, from said sales information management database;

a request item informing part informing selectable request items with the warranty

information retrieved by said warranty information retrieving part to the customer-terminal; and  
a request process conducting part conducting a request process corresponding to one of the selectable request items, which is indicated from the customer-terminal.

16. (PREVIOUSLY PRESENTED) The apparatus as claimed in claim 15, wherein:  
said sales information management database manages the customer information concerning the customer by corresponding the customer to the purchased product identification of the product that the customer purchased ; and  
said request process conducting part comprises:  
a repair request sheet distributing part distributing a repair request sheet including repair information for a repair person who is selected by searching from the sales information management database based on the customer information corresponding to the purchased product identification receive from the customer-terminal when one of the selectable request items, which is indicated from the customer-terminal, shows a request to repair the product that the customer purchased , and  
a repair contents maintaining part maintaining repair contents conducted by the repair person and the purchased product identification of a repaired product as repair history information to a repair history database.

17. (WITHDRAWN) A method for requesting to repair a purchased product through a customer-terminal, said method comprising:  
displaying a product list, listing purchased products at a display unit of the customer-terminal;  
sending purchased product identification, identifying a product selected from said product list by a customer using the customer-terminal, to a support center supporting the product; and  
requesting to repair the product, identified by the purchased product identification, by informing the support center of one of selectable request items, which is selected by the customer, when warranty information, showing warranty coverage of the product and the request items, is received from the support center.

18. (WITHDRAWN) A computer-readable recording medium having a program recorded thereon for causing a computer to request to repair a purchased product through a customer-terminal:

displaying a product list, listing purchased products, at a display unit of the customer-

terminal;

sending purchased product identification, identifying a product selected from said product list by a customer using the customer-terminal, to a support center supporting the product; and

requesting to repair the product, identified by the purchased product identification, by informing the support center one of selectable request items, which is selected by the customer, when warranty information showing warranty contents of the product and the request items are received from the support center.

19. (WITHDRAWN) An apparatus for requesting to repair a purchased product through a customer-terminal, comprising:

a displaying part displaying a product list listing purchased products at a display unit of the customer-terminal;

a sending part sending purchased product identification, identifying a product selected from said product list by a customer using the customer-terminal, to a support center supporting the product; and

a repair requesting part requesting to repair the product, identified by the purchased product identification, by informing the support center of one of selectable request items, which is selected by the customer, when warranty information showing warranty contents of the product and the request items are received from the support center.

20. (NEW) A method for managing product information, said method comprising: displaying a purchased product list including at least a list number, a purchased product information, and a purchase number for each purchased product at a customer-terminal;

creating a repair request form including the purchase number corresponding to the list number selected by the customer at the customer-terminal and sending the repair request form from the customer-terminal to a service center;

retrieving warranty information, corresponding to the purchase number received from the customer-terminal used by the customer, from a sales information management database managing the purchase number indicating a product that the customer purchased and warranty information showing a warranty of the product;

informing selectable request items with the retrieved warranty information to the customer-terminal; and

conducting a request process corresponding to one of the selectable request items, indicated from the customer-terminal.

21. (NEW) A computer-readable recording medium having a program recorded thereon for causing a computer to manage product information, by:

transmitting a purchased product list including at least a list number, a purchased product information, and a purchase number for each purchased product, wherein said transmitting of the purchased product list is for displaying at least the list number at a customer-terminal and creation of a repair request form including the purchase number corresponding to the list number selected by the customer at the customer-terminal to send the repair request form from the customer-terminal to a service center;

retrieving warranty information corresponding to the purchase number received from the customer-terminal used by the customer, from a sales information management database managing the purchase number identifying a product that the customer purchased and the warranty information showing a warranty of the product;

informing selectable request items with the retrieved warranty information to the customer-terminal; and

conducting a request process corresponding to one of the selectable request items, which is indicated from the customer-terminal.

22. (NEW) An apparatus for managing product information, comprising:

an output part transmitting a purchased product list including at least a list number and a purchased product identification identifying a product that a customer purchased for each purchased product, wherein said transmitting of the purchased product list is for displaying at least the list number at a customer-terminal and creation of a repair request form including a purchase number corresponding to the list number selected by the customer at the customer-terminal and to send the repair request form from the customer-terminal to a service center;

a sales information management database managing the purchase number indicating a product that the customer purchased and warranty information showing a warranty of the product;

a warranty information retrieving part retrieving warranty information corresponding to the purchase number received from the customer-terminal used by the customer, from said sales information management database;

a request item informing part informing selectable request items with the warranty information retrieved by said warranty information retrieving part to the customer-terminal; and

Serial No. 09/805,046

a request process conducting part conducting a request process corresponding to one of the selectable request items, which is indicated from the customer-terminal.
